

Research Fellow Seminars

Assessing the potential of scaling up successful agroecological initiatives

CLARA NICHOLLS

Permanent Lecturer, University of California, Berkeley

President, Latin American Scientific Society of Agroecology

Visiting Research Fellow, Research Institute for Humanity and Nature

May 8, 16:00 *Pathways for the amplification of agroecology*

June 5, 13:00 *Traditional agricultural systems and "agroecological lighthouses": testing two strategies in Japan*

@ RIHN Lecture Hall, Language: English

Dr. Nicholls' research focuses on the development of biodiverse agroecosystems that sponsor biological control of pest populations. She worked extensively in Latin America promoting agroecologically based approaches to agricultural sustainability. She joins the FEAST Project as a research fellow to assess the potential of scaling up agroecological initiatives in Japan.

Join us at the Research Institute for Humanity and Nature in Kyoto, Japan for two lectures and discussions!

Please RSVP to FEAST Secretariat
